

**MyHealthVet Focus Group** - The VA Black Hills Health Care System invites Veterans who utilize the MyHealthVet personal on-line health record to participate in a focus group. The focus group is designed to gather feedback, listen to users who have ideas for change or would like to see new features so the VA can ensure that the site serves and exceeds Veteran's needs. The first focus group will be held on January 21, 2010 at the Fort Meade VA Medical Center from noon until 4:00pm in Building 145, Room 108. MyHealthVet is an award-winning personal health record for Veterans created by the Department of Veterans Affairs (VA), and recognized by an independent group of health care professionals for innovation in computerizing medical records and enhancing a Veteran's partnership with VA's team of health care providers. You can access MyHealthVet, at [www.myhealth.va.gov](http://www.myhealth.va.gov). Veterans who enroll as patients at VA health care centers and get a My HealthVet account can order VA prescriptions online, store and access their military and health history, research trusted health information and create a personal health record that will link to their VA electronic record from anywhere at any time. Interested participants should RSVP to Dianna Monahan, RN at 605-720-7255.
